

KEY FEATURES & LARGEST SELECTION

Key Features

- *Built to last with welded, heavy-gauge steel and stainless steel.*
- *Nonelectric - they cost nothing to operate.*
- *Pay for themselves by drastically reducing tire repair or replacement costs and keeping vehicles in service.*
- *Easy to use - just move over area to be cleaned.*
- *Covered by lifetime warranty on the magnets.*
- *At use in thousands of manufacturing plants, storage yards, construction sites, airports and even on rough gravel roads.*

Largest Selection in the Industry

Dings co. has the largest selection of magnetic sweepers in the industry, with a style and size to fit every application. In addition to the six models described here, Dings also manufactures more powerful sweepers. These sweepers produce more magnetism over a larger area through a

greater distance. They operate at faster speeds and higher road clearances. For additional information, please contact us. We would be happy to mail you our full-line catalog.

Roadguard

Available in forklift, bracket, or trailer types (with choice of coupling). Also features a convenient release to discharge metal.

Flatguard

Metal debris can be released into removable onboard pans. Extremely durable and ideally suited for rough terrain.

Atlas and Remotias

Operates at fastest speeds and highest road clearances. Convenient handle release or optional cab-mounted switch for remote release.

Atlas FT3-24 with Extended Reach

Ideal for airports, three-unit hitch provides a 24-foot sweeping width in a single pass. Modules hook up in-line for travel to sweeping sites or storage.

LEADING MAGNET MANUFACTURER SINCE 1899

In addition to sweepers, Dings Co. manufactures a full line of magnetic separators for ferrous and nonferrous metals. They protect product from metal contaminants and prevent damage to processing equipment. Reclaiming steel or aluminum, concentrating minerals, and lifting materials are other important uses for Dings magnets.

To help you with your application, Dings Co. has sales engineers located at our manufacturing facility as well as local representatives throughout the U.S. and Canada. They can select and size a Dings magnet to your exact requirements.
